

ARCOLOGY LUNA - PLAYER MANUAL

A standalone interactive-fiction adventure for TIFE Core 2.3.1.

The year is 2087. Humanity's first self-contained lunar city has suffered a moonquake and coordinated sabotage. You command the emergency response.

HOW TO PLAY

Enter typed commands in the terminal or use the clickable command palette. Useful commands include LOOK, EXAMINE, TAKE, OPEN, SEARCH, USE, TALK, INVENTORY, QUESTS, JOURNAL, HINT, SAVE, and RESTORE.

Movement uses NORTH, SOUTH, EAST, WEST, UP, and DOWN.

MISSION GUIDE

Restore oxygen by finding a pressure manifold seal and repairing the algae bioreactors.

Stabilize reactor cooling with the emergency authority key.

Recover the phased-array controller from the disabled drone and install it in Communications.

Investigate Security and the Archives before descending into the old helium-3 mine.

ACCESSIBILITY AND SAVES

The Accessibility manager includes standard, low-vision, blind or screen-reader, hard-of-hearing, motor-assistance, and cognitive-support profiles.

Narration and ambience can be enabled on the cover screen. Save data is stored locally in the browser.
